NeuroFIT class

Brain Fitness Program

Brain Training as Building Blocks

Cognitive skills—like focusing, learning, reading, memorizing, and problem-solving—are critical at every stage of life.

NeuroFIT is a unique brain training program, powered by neurotechnology and engaging brain games. It supports cognitive development from childhood through adulthood and into one's senior years.

Studies show that strong cognitive skills are linked to better performance in school for children and success in the workplace and daily life for adults.

NeuroFIT helps you build and maintain these essential skills for a brighter future.

NeuroFIT Brain Training Program

Students from 6 years old

Age Groups

Adults and Seniors

NeuroFIT seeks to improve student's cognitive skills. Special emphasis is placed on attention and memory, that serve as the building blocks for students to excel on areas of learning such as Mathematics, Science and Languages.

NeuroFIT for adults and seniors help support cognitive health as we age. For adults, this can contribute to maintaining productivity, while for seniors, it can offer opportunities to prevent cognitive decline, and stay mentally active and engaged.

Available Curriculums

Class

NeuroFIT Class is a progressive curriculum, guiding users through **4 distinct courses** of brain training designed to enhance various cognitive skills.

Lite

A starter version of NeuroFIT where the SenzeBand is not required. Participants go through **3 progressive courses** in NeuroFIT Lite.

Recommended Course

12 Weeks

24 Sessions

30 mins/session

NeuroFIT Class Courses

NeuroFIT Class consists of **4 distinct courses** designed to train **5 key cognitive skills** - Attention, Decision, Spatial, Memory, and Mental Flexibility. Each course uses **6 different games** and **3 assessments** to monitor and track the training progress of each participant.

Foundation

Establish basic cognitive abilities by training in science-backed games offering simple challenges in cognitive skills.

Who's Who

Farmhouse Friends

Space 360

Flower Garden

Thread & Needle

Psychic Cyclist

Developmental

Level up learning abilities by adopting cognitive skills in simulated scenarios and introducing games with mental flexibility.

Stargazer

Supreme Shopper

Sushi Recall

Activity Book

Mindcopter

Psychic Cyclist

Holistic

Advance course for experiencing the application of cognitive skills in a more complex, simulated environment.

Dot Connect

Multitask Master

Junction Control

What's This Word

Mindcopter

Thread & Needle

Advanced

Train using cognitive and attention booster games that go beyond the progressive challenges to help maximise cognitive adaptations.

Stargazer

Multitask Master

Pyramid Solitaire

Memory Mahjong

Sitting Ducks

Mindcopter

NeuroFIT Lite Courses

NeuroFIT Lite is the perfect starter program for people new to brain training. It's simple and accessible – no SenzeBand required. Train **5 key cognitive skills** through **3 distinct courses**, each featuring **4 engaging games** and **3 assessments** to help you see real results.

NeuroFIT Training Flow

Do Assessment

Take the Neeuro Cognitive Assessment to get a baseline of participant's Cognitive functions.

Follow NeuroFIT Curriculum

Each session is 30 minutes that covers an introduction to a new concept, activities and then brain training.

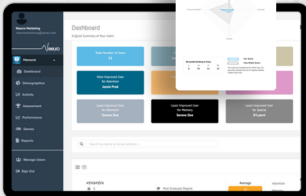

Understand the Scores and Effort

Understand how well the participant has scored, focused and used their mental effort while training.

Analyze and Track Performance

Use the Neeuro Enterprise Analytics Dashboard to produce regular reports for parents/educators to track progress.

NeuroFIT Training Benefits

Enhance focus, memory, and other cognitive skills

Improve efficiency and ability to perform daily tasks

Modern methods of learning to complement academic studies

Technology and curriculum designed by neuroscientists and experts

Brain health enhanced

Reduce risks of cognitive decline

Social engagement with peers and trainers
